Dear Montessori House Parents,

Calling all future scientists!! MHFC is offering a fantastic opportunity to involve your child in the captivating world of science. All Lower El and third year EC children are invited to participate in the MHFC Science Fair/Science Share. This project is entirely independent of the classroom, meaning that all of the work must take place outside of class time. This event is also completely optional, but I do hope that you will join us!

Attached to this letter, you will find a science fair packet full of information to get your child started. The first step that you will need to take is to register your child's project. You do not have to know what topic your child would like to explore in order to register them. Registration of your child is simply a way for me to communicate with those families wanting to participate. Please turn in this form by January 15th to the front office. This gives us time to make arrangement for set up and recognition materials.

The Science Fair/Science Share evening will take place on Tuesday, January 24th from 5:30-6:30. Students are welcome to arrive by 5:30 to set up their table. At 6:00pm, each child should be stationed at their project to "share" information about his or her project. Families are welcome to mingle and look at the other projects. Feel free to invite family, friends, and other MHFC members to the evening. All projects must go home after the program.

Since this project is voluntary, all questions need to be directed to the parent coordinator and not the teacher. Again, this is not a class project, but a wonderful way for your child to learn the scientific method and share their findings with others.

If you have any questions, please don't hesitate to contact me. I look forward to seeing your child's project!

Best,

Gail Roberson, Lily (Upper El) and Milo's(Lower El) mom
